Software engineer experienced in web analytics and full-stack web development.

Experience

Software Engineer | Sainsbury's | July 2024 – Present | London, UK

- Lead deployment of enterprise product analytics and tagging infrastructure across Sainsbury's, Argos, Habitat, and TU Clothing, web and app.
- Implemented custom JavaScript tracking tags and event pipelines using Adobe Analytics and Tealium, enabling real-time analytics insights and data-driven strategy.
- Winner of **Sainsbury's x Microsoft Hackathon** – built an AI-powered solution that went from prototype to working product, integrating multiple APIs across the business to demonstrate real customer value in 48 hours.
- *Tech – JavaScript, TypeScript, Next.js, React, Prisma, Postgres, Adobe Analytics, Tealium, AI, HTML, CSS*

Software Development Consultant | Reply | Sep 2023 – July 2024 | Manchester, UK

- Developed modular, reusable front-end components for enterprise clients.
- Built and optimised web solutions using JavaScript, HTML, CSS, Adobe Experience Manager (AEM) and Adobe Analytics, improving site functionality and data-driven insights.
- Awarded **"Rising Star"** for innovation and problem-solving.
- *Tech – React, JavaScript, Adobe Experience Manager, Adobe Analytics, HTML, CSS*

Sr. Technical Product Consultant | Adobe | Feb 2022 – Aug 2022 | Noida, India

- Facilitated clients in implementing and optimising web implementations for Adobe Analytics.
- Analysed client data to gain insights into customer spending behaviour and resolve outliers in reporting.
- *Tech - Adobe Analytics, JavaScript, HTML, CSS, SQL*

Developer | ICICI Lombard | Feb 2021 – Feb 2022 | Mumbai, India

- Developed Angular web apps to help field agents sign up customers for India's largest private insurance company. These web applications issued and renewed health insurance policies.
- Rebuilt legacy applications to improve page load time, mobile responsiveness, and reduce API usage.
- *Tech - Angular, JavaScript, HTML, CSS, React*

Frontend Intern | Viga Entertainment | Jul 2020 – Dec 2020 | Remote, India

- Worked on developing a React web app (https://www.moviecolab.com/) to serve as a repository for tracking sequences and shots in movie production. The application hosts media files and enables interaction between a director and their production team.
- *Tech - React, JavaScript, HTML, CSS*

Education

M.Sc. Computing Science | 2022 - 2023 | University of Glasgow, UK
Programming, Human-Computer Interaction, Internet Technology, Web Science | *Grade – Distinction*

B. Tech Information Technology | 2017 - 2021 | Manipal Institute of Technology, India
Data Structures, Algorithms, Object-Oriented Programming | *GPA – 7.81/10*

Technical Skills

- JavaScript, HTML, CSS, React, Next.js, Node, SQL, Git, Adobe Analytics, Prisma, Postgres

Personal Projects

MovieFlix – *https://movieflix-next-delta.vercel.app/*

- A movie recommendation platform that allows users to log in, review movies, and curate watchlists based on customised recommendations.
- GitHub
- Tech - Next.js, Prisma, PostgreSQL
